ABSTRACT

Since its founding in 1919 the Institute for International Education has conducted an annual census of foreign students in the United States. Data for this series is collected from U.S. institutions with the purpose of providing an accurate profile of the current number of foreign students and some of their characteristics. Categories of information gathered include: major host countries of foreign students; number and location of students; origin of students; additional characteristics (sex, academic level, fields of study, region); enrollment by institution, home country, and geographic distribution. Acknowledgments

To the thousands of men and women of the National Association of Foreign Student Affairs (NAFSA), and the Association of American Collegiate Registrars and Admissions Officers (AACRAO), whose cooperation in the collection of these statistics is voluntarily given, whose professionalism and interest is always evident, and whose criticism has been constructive and, even more importantly, useful.

To the Bureau of Educational and Cultural Affairs of the U.S. Department of State which has provided support for the collection and analysis of the data.

To Leo Goldstone of the U.N. Statistical Office and former Chief of the Division of Statistics on Education of the U.N., who has served as a consultant to the Task Force.

To Lester Singletary, Director of Student Record Systems at Georgia State University, who designed and subsequently processed the OPScan survey forms.

To Hugh Jenkins, Executive Director of NAFSA and his staff at Washington, for tireless efforts on behalf of the Joint Task Force.

To Naomi McCracken and Stan Berry, past and present Presidents of AACRAO; Wallace B. Edgerton, President of IIE; and Sanford Jameson and Donald Nelson, past and present Presidents of NAFSA, for their support and encouragement.

2. Foreign students in the U.S., 1954/5-1976/7. 4
3. U.S. and foreign students by type of control and level of college, 1975/6-1976/7. 6, 7
4. Eleven top states and their percentage share of the U.S. foreign students, 1970/1, 1975/6-1976/7. 9
5. Map of the U.S. showing foreign student density, 1976/7. 12
6. Distribution of foreign students by continent, 1955/6, 1965/6, 1975/6-1976/7. 14, 15
7. Eleven top countries and their share of the total foreign student population, 1970/1, 1975/6-1976/7. 17
8. Distribution of foreign students by academic level and continent, 1975/6. 22
9. Distribution of fields of study by percentage, 1955/6, 1965/6, 1975/6. 24

Definitions

Foreign Student

A foreign student has been defined as anyone who is enrolled in courses in the U.S. who is *not* a citizen or an immigrant (permanent resident). Refugees *are* included.

Higher Education

In respect to the United States, "Higher Education" is used to describe that group of colleges and universities listed in the *Education Directory, Colleges and Universities—1975-1976* and the immediately previous edition. Printed by the U.S. Government Printing Office it is National Center for Education Statistics document No. 76-130.

Fields of Study

The fields of study used in this document are those from *A Taxonomy of Instructional Programs in Higher Education*; also published by the NCES. See Appendix 8 (page 153) for the list of fields.

Regions

The countries and territories included under each major region are listed in Appendix 7 which begins on page 151.

Introduction

Since its founding in 1919, the Institute of International Education (IIE) has conducted an annual census of foreign students in the U.S. For the first 30 years this effort was carried out jointly by IIE and the Committee on Friendly Relations Among Foreign Students.

IIE's first independent publication of the results of the annual census was *Education for One World* in 1948/9. Six years later (1954/5) the census results were published in *Open Doors*, the present title of the series.

Data for *Open Doors* is collected from U.S. institutions with the purpose of providing an accurate "snapshot" of the current numbers of foreign students and of some of their basic characteristics.

For many years, the methodology required the completion of a partially precoded form by each individual foreign student in the U.S. Each institution assigned a contact—usually the Foreign Student Adviser (FSA) or Registrar—to act as an intermediary and to be responsible for the dissemination, collection and return of these forms. Upon receipt of the forms, the coding process was completed and, using computers, tabulated and the results published.

In the days of fewer numbers, less sensitivity to questions of privacy, larger institutional budgets, and little or no registration by mail, this methodology of "head counting" worked reasonably well.

However, early in the 1970s it became apparent that institutions were finding it too time-consuming and expensive to report their foreign students in full detail.

The usefulness of the "head count" system declined and, more importantly, demand increased for greater depth in reporting on the basic characteristics of the foreign student.

During the summer of 1974, representatives of the Institute of International Education, the National Association for Foreign Student Affairs (NAFSA), the American Association of Collegiate Registrars and Admissions Officers (AACRAO) and the Bureau of Educational and Cultural Affairs (CU) of the Department of State came together to try to find an alternative method of collecting data on foreign students.

As a result, in 1973, an inter-associational working group was formed in order to devise a solution to the problem. Known as the "Joint Task Force on Data Collection," it consists of representatives from AACRAO, IIE and NAFSA.

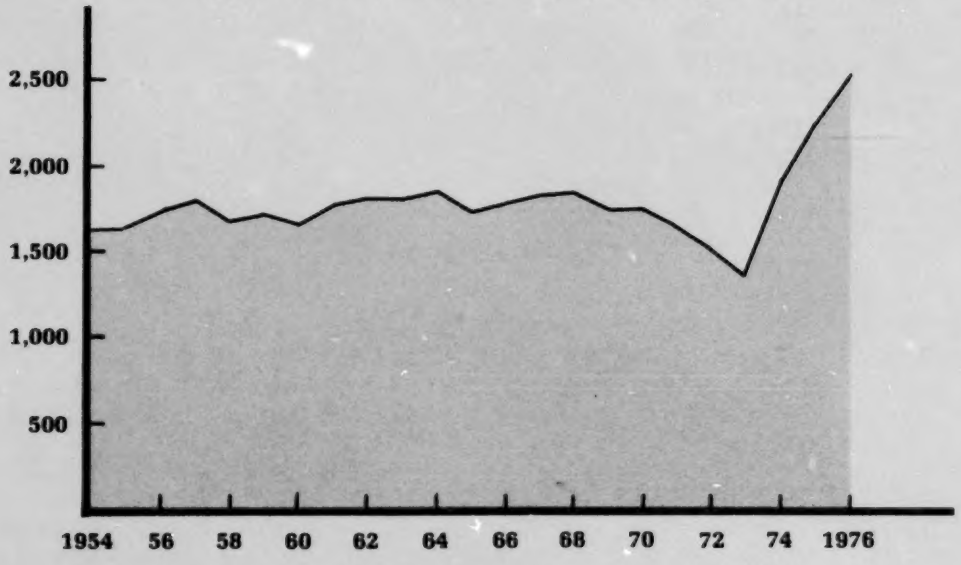
Because the problems largely resulted from the use of a system which required substantial voluntary effort and expense on the part of reporting officials, it was agreed that accuracy could be substantially increased by decreasing the effort required to report. A reporting system was established that replaced the individual student form with aggregate reports from each institution allowing the use of selected "sampling" techniques.

Even though not every institution responded with aggregate data and many sent only partial reports, valid "samples" could be selected providing representative information on the entire pool. This is the method we've been following since the survey of 1974/5.

In 1975/6, we surveyed for country, field, academic level, and institution. The results met our expectations, allowing us to state—with a high degree of confidence—the composition of the foreign student group in respect to those characteristics even though we received *detailed* responses from less than 100% of the institutions. It was not thought necessary to ask for this information every year, but correlations will be asked for in the future in order to periodically assess changes in the patterns.

For 1976/7, the AACRAO/IIE/NAFSA Task Force moved toward surveying for additional data that would provide an adequate sample from which we could extrapolate totals on: Sex, Visa Type, Source of Funds, Marital Status, Programs Presently

INSTITUTIONS RESPONDING 1954/5-1976/7



Being Pursued, Fields of Study, and Country. An Optical Scanning (OPScan) form was introduced for speedier processing as well as for soliciting answers to an expanded group of questions. It is intended to continue to use the OPScan method in subsequent years and to supplement it whenever necessary to obtain additional information.

The use of simplified reporting methods has resulted in a growing response rate and increased basic counts. Whenever the detailed information which is provided is sufficiently large, the results are extrapolated into actual totals. In other cases, the detailed responses are left in percentage terms. Detailed notes on the nature of these extrapolations will be found in the notes to the affected Tables and Appendices.

This edition of *Open Doors* covers two academic years—1975/6 and 1976/7—and contains the results of the surveys undertaken for those years. Where possible, comparisons are made both between the two years and with the situation in earlier years so that some idea of trends can be obtained. The questionnaires used in these two years differed slightly in detail so some topics are described for a single year only.

Table 1 shows the response to the surveys carried out over the last three years and also gives comparative figures for 1970/1.

The number of institutions polled remains fairly constant at about three thousand, but the total response has risen steadily from 62% in 1974/5 to 84% in 1976/7. The number of positive responses has risen even more strikingly. In 1974/5, some 57% of the institutions polled responded positively, by 1976/7 this had risen to 76%. It is interesting to compare this trend with the situation at the beginning of the decade when, with a somewhat smaller number of institutions polled, there was a total response rate of 71% and a positive response rate of 64%—a little below that for 1975/6.

The number of foreign students reported has also risen strikingly from some 118,000 in 1970/1 to 180,000 in 1975/6 and over 200,000 in 1976/7—the highest figure ever recorded. The increase is in some part due, of course, to the increase in the number of institutions responding but, as will be seen later by an examination of individual institutions, it is also due in part to a genuine increase in foreign student enrollment. In fact, the number of foreign students per institution has risen from an average of 67.10 per positive reporting institution in 1970/1 to an all-time high of 88.52 in 1976/7, following a drop from 1974/5 to 1975/6.

Table 2 shows the type of responses for the two years covered by this edition of *Open Doors*, i.e., a breakdown of the 2,261 and 2,524 responses indicated in Table 1 for 1975/6 and 1976/7 respectively.

It will be seen that although the total response increased over the two years, the level of detail provided fell significantly with the percentage of institutions providing a detailed response falling by half—from just over 80% to just under 40%. Accordingly, the 1977/8 survey will aim at increasing the level of detail obtained while maintaining the overall level of response.

Table 1

Year	Institutions Surveyed	Survey Response: Number Replied Positive	Number Replied Negative	Total	% Response	Total Foreign Students
1970/1	2,729	1,758	192	1,940	71.1	117,976
1974/5	3,085	1,760	288	1,908	61.8	154,580
1975/6	3,065	2,093	168	2,261	73.8	179,344
1976/7	3,016	2,294	230	2,524	83.7	203,068

Table 2

Type of responses

Year	No Data	Total Only	Detailed Response	Printouts or Registers	Total
1975/6	168 (7.4%)	232 (10.3%)	1227 (54.3%)	634 (28.0%)	2261 (100.0%)
1976/7	230 (9.1%)	1323 (52.4%)	955 (37.9%)	16 (0.6%)	2524 (100.0%)

An Overview

Before detailing the size, distribution and composition of foreign students in the U.S., it might be useful to provide a brief overall account of the foreign student situation throughout the world so that the foreign student situation in the U.S. can be placed in its proper perspective.

Table 3 shows the ten major host countries, among the developed countries, for foreign students taking 1969 and 1975 as the two years of comparison.

The United States is the largest host country for both years, but it is interesting to note that it accounts for a decreasing proportion of the world total. In 1969, the U.S. accounted for some 45% of the estimated foreign student enrollment in the top ten countries but, by 1975, this figure had dropped to just over 30% even though there had been an increase of some 33% in the actual number of foreign students reported from 1969/70 to 1973/4. France, however, has better than tripled its actual number of foreign students and has increased its share of the foreign student population represented by the top ten countries from 12.5% to 20.7%. As is the case with the U.S. figures, this is at least partially the result of improved reporting methods. Canada, another country where improved reporting methods have been put into place, has shown a five-fold increase in actual counts.

Table 4 relates the U.S. figures of foreign students to the total enrollment in higher education in the country.

Foreign enrollment has risen steadily from just over 50 thousand in 1960/1 to just over 200 thousand in 1976/7. However, the total enrollment has also risen in a similar way from 3.6 million in 1960/1 to over 11 million. Thus, the percentage of foreign students in the U.S. has not changed significantly in fifteen years. It was 1.5% in 1960/1 and fifteen years later it was 1.6%. In 1976/7 there has been a slight increase to 1.8%, but this is partly due to the fact that in 1976/7 there occurred one of the first absolute decreases in the number of students enrolled in higher education at the same time as there was the best response ever to the *Open Door* questionnaire.

Table 3

Ten major host countries[1] of foreign students

1975 Position	Country	Thousands 1969	1975
1	United States of America	135.0	179.3
2	France	34.9	119.5[2]
3	Canada	19.9	98.4
4	United Kingdom	22.8	49.0
5	Federal Republic of Germany	26.7	47.3
6	USSR	—	30.6[3]
7	Italy	12.3	18.9
8	Japan	10.1	14.5
9	Austria	8.5	10.3
10	Switzerland	9.1	10.1

[2] 1974 figures.
[3] 1973 figures.

Table 4

Total higher education and foreign enrollment in the U.S.

Year	Total Enrollment[1]	Foreign Enrollment	Percentage Foreign Enrollment
1960/1	3,583,700	53,100	1.5
1969/70	8,066,200	135,000	1.7
1975/6	11,290,700	179,300	1.6
1976/7	11,121,400	203,100	1.8

[1] **Source: National Center for Education Statistics, Washington, D.C.**

Table 5 seeks to put these foreign student percentage figures, ranging from 1.5% to 1.8%, in their world perspective by listing the top ten developed countries with the greatest proportion of foreign students in relation to their total enrollment in higher education for the years 1969 and 1973.

In this table, the United States does not rank in the first ten and must be shown in parenthesis in nineteenth and twenty-first place respectively for the two years. It is particularly interesting to compare these figures with neighboring Canada which now reports one-sixth of its students as foreign or even with a comparatively poor country like Greece where nearly a tenth of the students are foreign.

Analyses produced by UNESCO provide additional data in respect to the "nature" of these exchanges. These suggest that while a fairly large proportion of students who go abroad to study do so within their own general regions, there has been some decline, however slight, in that number, indicating a greater willingness to move beyond the ties established by common language, culture or politics.

To complete this international review, Table 6 provides information on foreign students not in terms of their country of study, as do the previous tables; but in terms of their country of origin.

In this table, which is not limited to developed countries, but covers all countries of the world, it can be seen that by 1973, the U.S. was leading the table, i.e., there were more U.S. students abroad than there were from any other country. The United States might be the largest importing country, as is shown in Table 3, but it is also the largest exporting country. It accounts for an increasing proportion of the world's foreign students—nearly 5% in 1973 which is the latest year for which reasonably comprehensive data are available.

It has been suggested that the number of U.S. students reported as going abroad to study may be badly underestimated. Several facts seem to confirm this. During the period 1970 through 1978 the number of overseas study programs available to American students has increased enormously. Two annual IIE publications, *Summer Study Abroad* and *U.S. College-Sponsored Programs Abroad: Academic Year* catalog programs which attract large numbers of U.S. students. In the 1978 editions of these two books there are listed a total of 1,589 separate programs. In 1970, the total number listed was only about half that number. Additionally, a survey of the institutions which actually did run programs in 1976 suggests that the number of U.S. students abroad may be three or four times greater than the figures currently available. In the fall of 1978 IIE will undertake another survey of foreign institutions in order to update the figures on the number of U.S. students abroad.

Table 5

Ten major countries[1] with the greatest proportion of foreign students in relation to total higher education enrollment

Country	1969	1975
Canada	3.5[2]	16.9[2]

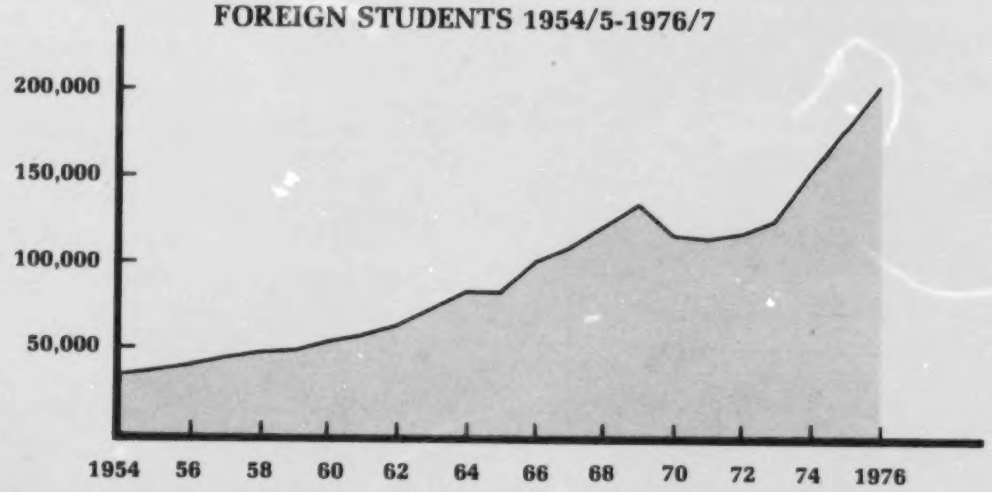
FOREIGN STUDENTS 1954/5-1976/7



Number and Location of Students

In 1976/7, foreign student enrollment in the United States exceeded 200,000 for the first time. With 2,524 institutions reporting, the final count for the academic year was 203,068—the highest figure ever reported in *Open Doors*. Table 6 gives the enrollment figures for the last four years and for two earlier years which were selected as base years.

Table 7 shows a considerable and steady rise in foreign student enrollment during the fifties, sixties and early seventies so that by 1974/5, the 150,000 mark had been passed. During the same period, the number of institutions reporting foreign students rose slightly, reaching a peak in 1964/5 and then falling to a low of 1,359 in 1973/4. In 1974/5, partly as a result of this declining response, there were two changes adopted in the method of data collection and definition. Before that year, a detailed questionnaire was issued to each student through the Foreign Student Adviser, and all students, whether immigrant or non-immigrant were included in the total count. In 1974/5, the survey was divided into two parts—a simple postcard asking for the basic foreign student count and an accompanying detailed questionnaire for those institutions able to provide the required details.

The primary result was a 40% increase in the number of institutions responding, an increase which has continued, although naturally at a declining rate as the responses approach saturation point—it is now 84%. In 1976/7, for the first time, over 2,500 institutions reported, of which some 2,300 reported the presence of foreign students.

The effect of the increased response rate was to increase the number of students reported by 24% in the first year of the change-over and 16% and 12% in successive years.

In 1974/5, it was also decided to exclude immigrants as they were not really considered to be foreign students in the sense of foreign nationals coming to study in the U.S., but still as part of their own national system with the implication that, in due course, they would return to their country. Unfortunately, it was not found possible to revise earlier than 1970/1 to exclude immigrants as the necessary information was not available.

Valid comparisons can be made over the last three years where a steady increase in foreign student enrollment has been recorded. This has been accompanied by a steady increase in the number of institutions reporting, but the increase in enrollment is not wholly attributable to the increase in reporting. It is more than simply a function of the greater efficiency of the survey system. The average number of students per reporting institution was 81.0, 79.3 and 80.5 in 1974/5, and 1975/6 and 1976/7 respectively, indicating at first glance that the increase in enrollment was wholly a function of increased reporting.

A considerable number of the institutions that reported, reported however, no foreign students. The average number of students, per reporting institution that reported foreign students, was 87.8, 85.7 and 88.5 in 1974/5, 1975/6 and 1976/7 respectively, suggesting a genuine increase in enrollment particularly when compared to the average of 67.1 for 1970/1. This real increase will also be confirmed when examining the detailed figures of major institutions later in this section. It will be interesting to see the results of the 1977/8 survey where it is not

Table 7

Foreign Students 1954/5 – 1976/7

Year	Number of Students	Annual Rate of Increase	Number of Institutions Reporting	Annual Rate of Increase
1954/5	24,232		1,629	
1964/5	82,045	13.0%	1,859	1.3%
1970/1	117,976	6.2%	1,748	(– 1.1%)
1973/4	125,116	2.0%	1,359	(– 8.8%)
1974/5[1]	154,580	23.5%	1,908	40.4%
1975/6	179,344	16.0%	2,261	18.5%
1976/7	203,068	13.2%	2,524	11.6%

[1] In 1974/5 a simple postcard method of obtaining the basic count was adopted and immigrants were excluded.

expected that there will be much significant increase in the number of reporting institutions. The detailed yearly figures found in Table 8 have been plotted in the following graph.

Table 9 compares the number and distribution of foreign students in public and private institutions, junior and other colleges and by size of institution. It seeks to compare these distributions with those found among all students in the U.S.

Table 8

Foreign Students 1954/5—1976/7

Year	Students Reported	Institutions Reporting
1954/5	34,232	1,629
1955/6	36,494	1,630
1956/7	40,666	1,734
1957/8	43,391	1,801
1958/9	47,245	1,680
1959/60	48,486	1,712
1960/1	53,107	1,666
1961/2	58,086	1,798
1962/3	64,705	1,805
1963/4	74,814	1,805
1964/5	82,045	1,859
1965/6	82,709	1,755
1966/7	100,262	1,797
1967/8	110,315	1,827
1968/9	121,362	1,846
1969/70	134,959	1,734
1970/1	117,976[1]	1,748
1971/2	114,024	1,650
1972/3	118,481	1,508
1973/4	125,116	1,359
1974/5	154,580[2]	1,908[2]
1975/6	179,344	2,261
1976/7	203,068	2,524

[1] In 1970/1, immigrants and non-immigrants were separately counted and immigrants were excluded.
[2] In 1974/5 a simple postcard method of obtaining the basic count was adopted and immigrants were excluded.

In 1976/7, a little more than two-thirds of the foreign students were enrolled in public institutions which is slightly more than in the previous year. This is a significantly smaller proportion than is found in the total student body where over three-quarters of the students are enrolled in public institutions. Clearly, the private institution is either more attractive or has made greater efforts to attract foreign students than public institutions.

In respect to level of college, a rising proportion of foreign students are enrolled at junior colleges. The proportion has risen steadily from 10.6% in 1970 to 15.6% in 1976/7. This is in line with the increase in total enrollment in junior colleges which accounted for a quarter of all students in 1970/1 but now accounts for over one-third. However, despite the rising trend in foreign student enrollment in junior colleges, there continues to be a significantly smaller proportion of foreign students in junior colleges than for the student body as a whole although the difference is very slowly diminishing.

About three quarters of the foreign students study in institutions with a student body in excess of 5,000, which is a proportion only slightly in excess of the national average. However, nearly 8% of foreign students study in institutions with fewer than 1,000 students, a figure considerably in excess of the national average of 5%. The figures for 1975/6 and 1976/7 show little difference with the percentage of students in the group of institutions with low enrollment falling slightly.

Table 10 gives the distribution of foreign students by major U.S. region.

About 80% of the foreign students are spread fairly equally over four regions—Midwest, South, Northeast and Pacific. The main changes since the end of the sixties are the decrease in the percentage studying in the Midwest which, although still the largest group, has fallen from 27% to 22%; and the doubling of the percentage in attendance in the Southwest from 6.4% to 12.7%. The Northeast has fallen steadily and the South has increased as steadily. At the present rate of change, 1977/8 should see the South overtake the Midwest to become the region containing the largest number of foreign students.

Table 11 presents the foreign student enrollment in the top eleven states for the last two years and two base years, in order of magnitude for the year 1976/7, both in absolute terms and percentage share. There are some interesting changes, and the data on percentage share for the years between 1964/5 and 1976/7 are plotted in the graph on page 9.

It is interesting to note that while the top states constitute a considerable proportion of the total number of foreign students in the country, the proportion has been decreasing as shown in Table 12. Nevertheless, two out of every five foreign students still go to one of the five top ranking states and three out of every five go to one of the top eleven states.

California stays number one throughout the period with a share between 17% and 15%—at the present time one out of every six or seven foreign students is studying in California. However, New York while holding onto the second position shows a steadily falling percentage share, from over 13% in the sixties to under 10% for the first time in 1976/7. By contrast, Texas has risen steadily from a percentage share of a little over 3% in the sixties to a current one of 8%. It is likely that Texas will overtake New York as the number two state in the next year or two. Florida is another state to show a clear trend. From a very low percentage share in the mid-sixties, it had risen by the early seventies to the number three position at nearly 7%. This was the result of the political situation in Cuba. The subsequent fall was partly due to the decrease in immigration and the decision in recent years to exclude immigrants from the count.

The remaining seven states maintain a rather constant position, the order changing occasionally, some falling steadily like Pennsylvania and Michigan and some showing recent rises like Oklahoma and the District of Columbia. The eight states occupying the fourth to eleventh positions have moved closer together—separated now only by 1.5% whereas in 1964/5 they were separated by 4.7%. It is also interesting to note that the top eleven states have fairly constantly accounted for a little over 60% of all foreign students, but their share in the last two years is a few percentage points below that of the earlier years and is decreasing. Similarly, the top five states that used to account for about 46% of all students now account for about 40%, and the top three states that used to account for about 36% now account for about 32%. The yearly figures in percentage terms for all states are in Table 13.

The states are listed alphabetically and shown in both number and percentage terms. Almost all states show a rise in actual enrollment, the only exceptions being Illinois, New York, South Carolina and Virginia which registered small decreases. A number of states showed significant increases in their percentage share of total foreign student enrollment over the two years, namely California, Louisiana, Ohio, Texas and Utah, whereas a few states showed a clear fall in their percentage share namely Florida, Illinois, Massachusetts, Michigan and New York.

Table 14 shows the foreign student enrollment in the top twenty institutions.

The table gives the number of foreign students, the total enrollment, and the percentage of foreign students for the twenty institutions with most foreign students in 1975/6 and 1976/7 showing their relative position in each year. The relative

[1] *Source:* National Center for Education Statistics, Washington, D.C.

* In order of magnitude

positions of the top seven institutions have changed little with the exception of the rise of the University of Houston, main campus, from seventh to third position.

Lower down the table a number of institutions show significant rises in position, particularly George Washington University and the four institutions that joined the top twenty in 1976/7—namely, Louisiana State University at Baton Rouge, the University of Washington, the University of Kansas main campus, and American University.

Institutions dropping a significant number of places include the University of California at Berkeley, Massachusetts Institute of Technology, the University of Indiana at Bloomington, and the four institutions which dropped out of the top twenty altogether—Columbia University Main Division, the University of San Francisco, the University of Illinois at Urbana, and the State University of New York at Buffalo.

Of the twenty-four institutions included in this table only seven showed a decrease in foreign student enrollment. They were: Miami-Dade Community College, The University of Michigan at Ann Arbor, the University of California at Berkeley, Columbia University Main Division, the University of San Francisco, the University of Illinois at Urbana, and the State University of New York at Buffalo. Similarly, only five institutions showed a decrease in the percentage of the student body that was foreign.

Howard University, Massachusetts Institute of Technology, and the University of San Francisco continued to report a foreign student population which exceeded 17% of the total student body. A few institutions like Miami-Dade Community College, The University of Southern California, George Washington University, Harvard University, and Stanford University were around the 10% mark, but about half of the institutions were at 6% or less and a quarter around or below 4%. Of the top institutions, the University of California at Berkeley at 2.5% and the Universities of California at Los Angeles and Illinois at Urbana, at just over 3%, had the lowest foreign student percentage.

It is interesting to note that while the top institutions constitute a considerable proportion of the total number of foreign students in the country, this proportion is decreasing slightly, as is shown in Table 15.

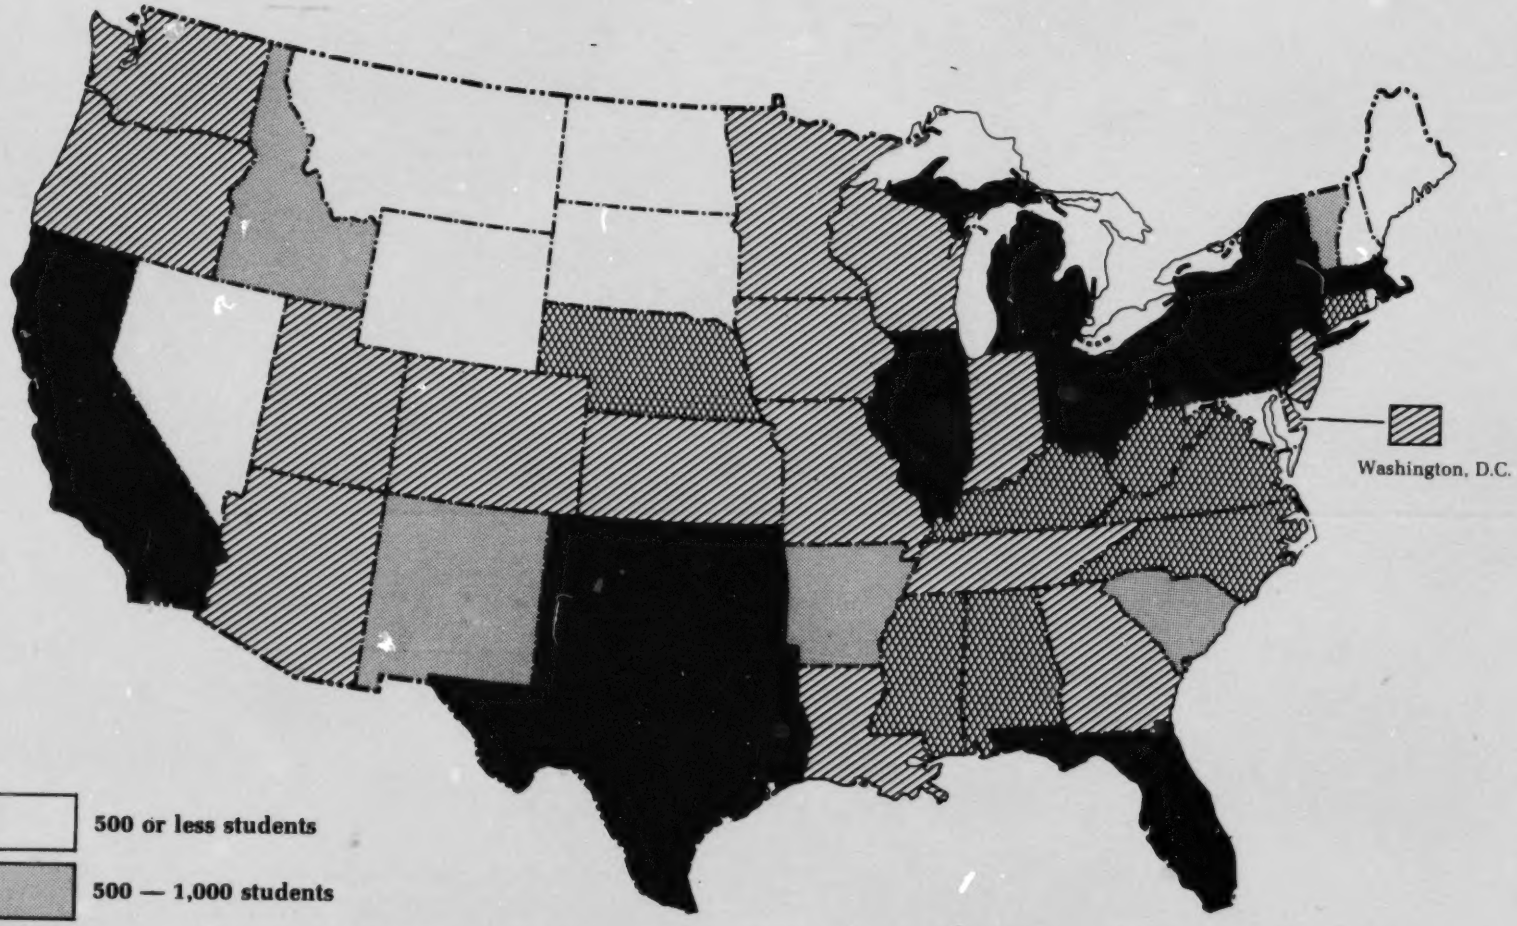
Table 15 Foreign students by institution groups

	1975/6 Enrollment	1975/6 % of Total	1976/7 Enrollment	1976/7 % of Total
Top 5 Institutions	12,361	6.9	13,253	6.5
Top 10 Institutions	20,080	11.2	22,316	10.0
Top 20 Institutions	33,035	18.4	36,865	18.1

Nevertheless, nearly one in five foreign students goes to one of the top twenty institutions and one in ten attends one of the top ten.

In Appendix 1, detailed figures of foreign student enrollment are given for each institution for both 1975/6 and 1976/7. This is in the form of a computer print-out listing institutions alphabetically by state.

Foreign students in the United States, 1976/7



Puerto Rico, 801
Alaska, 82
Hawaii, 2,279

Origin of Students

Table 17 gives the origin of foreign students by major continental grouping, while Table 18 provides detail at the subregional level.

About one-third of the foreign students come from South East Asia, and this has been consistent since the fifties; 1975/6 saw a peak and the figure dropped slightly in 1976/7. On the other hand, the number of students from South West Asia has risen steadily and in 1976/7 reached an all-time high of 19%. In the last two years, the number of students from Europe, North America and Oceania has remained constant, although the rates for Europe and North America are far below the figures for the fifties and sixties. Students from Latin America have fluctuated around the one-sixth mark with a small rise in 1976/7. Students from Africa constitute about one-eighth of the foreign student body, with a small decrease in the last year, although the figures are considerably higher than those for the fifties and sixties.

The major subregion in Africa is clearly Western Africa, but the only subregion to increase its percentage share was Northern Africa. In Asia, with over half the foreign students, are the largest subregions of all—Southwest Asia, already singled out in the previous table, and East Asia. Whereas East Asia and Middle South Asia showed a decreasing percentage, both Southeast Asia and Southwest Asia increased.

In Latin America, both the Caribbean and Central America increased their share, the Caribbean particularly. In South America, North America, Europe and Oceania there was little change.

	1964/5	1970/1	1975/6	1976/7
Top 5 countries	36.5%	37.1%	35.8%	34.2%
Top 10 countries	51.1%	53.8%	54.3%	52.4%
Top 15 countries	60.3%	62.5%	62.9%	63.1%

Table 19 shows the fifteen major countries of origin for the last two years and two base years.

In the last two years, Iran has been by far the largest country of origin—providing nearly twice as many students as the second placed country. At 11.5% of all foreign students, this is the highest percentage ever recorded by a single country and means that one in every nine foreign students in the United States is from Iran. Iran is followed by a group of five countries, each with about 5% or 6% of the foreign student population, namely Republic of China, Nigeria, Canada, Hong Kong and India. After them comes a further group of countries each at about the 3% level—Vietnam, Japan, Mexico, Thailand and Venezuela. As will be expected, there are few extreme changes from one year to the next—the two exceptions being Vietnam, which more than doubled its number and percentage share, and Saudi Arabia whose total number of foreign students increased by 50%. The rapid rise in the figures for Cuba is probably attributable to an increased number of immigrants that were included in the 1976/7 totals despite the instructions to exclude them.

It is interesting to compare the current pattern with that which existed in the mid-sixties and early seventies. Then Canada was in first position followed by India and the Republic of China—all with over 8%. Some countries have remained consistently in the top fifteen, like Iran, Japan, Hong Kong, Republic of Korea and Thailand. Others, like the Philippines, Greece, Israel, and the Federal Republic of Germany, have dropped out, while others, like Saudi Arabia, Venezuela and Nigeria, have appeared prominently only in recent years. Mexico is another country which shows a steady rise in position.

If one compares the four years in terms of the share of all foreign students taken by the top countries, there is surprising consistency.

About a third of the foreign students come from the top five countries, and this is comparatively unchanged despite the growing weight of the leading country, Iran. Half the students come from the top ten countries and nearly two-thirds come from the top fifteen. Given the large number of countries from which students are drawn, the figures show a clear concentration of students from a surprisingly limited number of countries. In fact, the 42 countries with more than 1,000 foreign students each, total 85.5% of all foreign students. See Table 23 for the list.

Foreign students by continent

The figures showing the detailed country by country estimates for 1975/6 and 1976/7 are given in Appendices 2 and 3 respectively, which are at the end of this book. These estimates have been extrapolated from a base count derived from detailed replies provided by a large number of institutions. An explanatory note is included with each of the Appendices describing how the estimates were made and how the table is presented.

The changes in the major countries of origin can be shown in another way and Table 20 shows the twenty leading countries in 1976/7 with their relative positions in 1975/6 and 1971/2. Over the five years covered by this table there have been many dramatic changes in relative positions. Four of the current top twenty countries were not even included in the 1971/2 rankings. These were Vietnam (now 7th), Saudi Arabia (now 12th), Malaysia (now 15th) and Lebanon (now 19th). Iran, currently the top country, was sixth in 1971/2 and has changed places with the then top country, India, which is now sixth. Hong Kong and Canada, formerly ranked second and third, have also declined in position although not as sharply as India, which also posted a decrease in the actual number of students. Declines in position were also posted by Japan, Thailand, Korea, U.K., Pakistan, Colombia and Israel. Increases in position were reported by China (up 2 places), Nigeria (up 5 places), Mexico (up 4 places), Venezuela (up 3 places) and Brazil (up 2 places).

An interesting sub-set of countries are those which are members of the Organization of Petroleum Exporting Countries. (See Table 21.) In 1971/2, they sent 14,090 students to the U.S. By 1976/7, that had increased to 52,040, a more than 350% increase during the five-year period when the total foreign student population increased by 178%. As a result, students from OPEC countries are now 25.6% of the total compared to 12.4% in 1971/2.

Table 22 shows the five major countries in each continental region with their shares of their appropriate regional total.

Nigeria now takes up nearly half the enrollment from Africa, and the top five countries in Africa account for about 70% of African foreign students, as opposed to about 60% in the sixties and early seventies.

The United Kingdom continues to account for approximately one-fifth of the European students with the top five countries accounting for some 60%—a figure that is slightly less than in earlier years.

In South and East Asia, the Republic of China, Hong Kong and India dominate the region. They consistently account for about half the students, but constitute a steadily decreasing percentage, as do the top five countries whose share in the last year fell from 78% to 72%. This drop is primarily due to the emergence of a sixth large contributor—Vietnam.

Iran accounts for some 60% of all students from the South West Asian region—considerably higher than its share in earlier years, and the top five countries account for nearly 90% of the region by contrast to about 80% in the base years.

Latin America shows a more even distribution between countries, as does Europe, with the top five countries now accounting for about 60% of the students from the region. However, in Latin America this percentage is rising and the emergence of one or two dominating countries, like Mexico and Venezuela, is a distinct possibility, particularly when one remembers that the Cuban figures are probably inflated by the inclusion of some immigrants.

The pattern throughout most of the regions is one of an overwhelming preponderance by one or two countries—a trend which shows no sign of decreasing except in Europe.

As detailed in Table 24, the percentage of foreign students enrolling in junior colleges has increased in all regions and sub-regions except North America. The increase has been most marked in respect to students from Central America, South East Asia, Oceania and South West Asia where, respectively 31%, 26%, 25% and 22% are attending junior colleges. The biggest proportion of all, 43%, is found among students from the Caribbean. The Caribbean figures have always been high; even in 1970/71, their students constituted 40% of the students enrolled in junior colleges.

Table 25 shows the distribution of foreign students from major countries by U.S. region. The first conclusion to be drawn is that there has been, over the time span covered by this table, a broadening of the distribution. Of the seven countries which appear for both 1969/70 and 1976/7, all had more than three-quarters of their students concentrated in only three of the regions with the Midwest, Pacific and Northeast being most represented. By 1976/7, only Iran continued to have more than three-quarters of its students in three regions. Also, the most represented regions had shifted to the Midwest, the South and the Southwest.

As can be seen in this table, the Midwest region has been least affected remaining relatively stable. The Northeast and Pacific regions, by contrast have shown substantial decreases, while the South and Southwest appear to have been the areas chosen in preference to these previously popular areas.

Iranian students, for example, in 1969/70 were located about 46% in the Northeast and Pacific States with about 25% in the South and Southwest. Seven years later in 1976/7, the pattern has almost exactly reversed with 51% in the South and Southwest and only 20% in the Northeast and Pacific States.

Canada, China, Hong Kong, India, Japan and Thailand all follow the same pattern as Iran, a shift from the Northeast and Pacific to the South and Southwest.

Additional Characteristics

Table 26 shows the distribution of foreign students by sex. Females constitute a steadily growing percentage of foreign students, increasing slowly until 1970/1 and then rapidly by 1976/7 to equal approximately one-third of all foreign students. The percentage of females at junior colleges is particularly high at 40%.

Table 27 gives the distribution of foreign students by academic level—undergraduate or graduate. Since 1975/6, a little over half of the foreign students were enrolled at the undergraduate level. But this was not always the case; in the mid-sixties there were slightly more graduates than undergraduates, while in the fifties the undergraduates were clearly in the majority with 57.9% of the total.

Table 28 shows, for 1975/6, the distribution within academic level by continent. Students from Asia, North America, and Oceania hold to the overall pattern of slightly more enrollment on the undergraduate than graduate level. Among students from Africa, South West Asia, and Latin America, however, undergraduates account for over 60% with the highest percentage—63.3%—from South West Asia. By contrast, among students from South East Asia and Europe, fewer than 45% are studying at the undergraduate level.

The distribution within academic level by subregion and major country will be found in Appendix 4. Only those countries providing a sizeable number of students—around 500 or more—have been included in Appendix 4.

A detailed examination of Appendix 4 illustrates that within the subcontinental groups, there are wide variations. In the East Asia group, where 46% of all the foreign students are undergraduates, you will find Hong Kong with 68% undergraduates and the Republic of China with only 20% undergraduates. From Argentina, 39% of the students are undergraduates; from Venezuela, the percentage of undergraduates is 73%. Nearly every region has such differences.

Table 29 gives the distribution of foreign students by major field of study. (A full list of the field of study taxonomy used in this book can be found in Appendix 8.)

Engineering, which has been the most popular field throughout the twenty-one-year period covered by Table 29, has grown by only about 6% in that time. That is, the percentage of all foreign students who are studying Engineering is only 6% greater in 1976/7 than it was in 1955/6 even though the actual number of the foreign engineering students is about six times what it was in 1955/6.

Business and Management, which ranked sixth in 1955/6, now ranks as the second most popular field with nearly eleven times more students in 1976/7 as in 1955/6. It's share of all students has nearly doubled—from 9.0% in 1955/6 to 17.2% in 1976/7.

By contrast, the third and fourth ranked fields of study—the Natural and Life Sciences and the Social Sciences—have declined in relative importance even though the number of students enrolled in those fields has been increasing. In fact, there are now about 5½ times as many foreign students studying the Natural & Life Sciences as there were in 1955/6, but the total number of foreign students in the United States has also increased 5½ times so the share in the Natural & Life Sciences remains the same.

The size of the group studying the Social Sciences has increased over the twenty-one-year period but has not kept pace with the increase of all foreign students. As a result, the percentage studying the Social Sciences has declined markedly.

The Humanities, Fine and Applied Arts, the Health Professions, and Agriculture and Natural Resources have followed the pattern set by the Social Sciences: an increase in actual numbers in the particular field but a rate of increase slower than that of the total group.

The final two major fields, Education and Mathematics and Computer Science, have shown substantial real growth. Education has seven times as many students in 1976/7 as in 1955/6 and a growth in respect to its share of all students of 25%. Mathematics and Computer Science, in twenty-one years, has gone from about 450 foreign students to nearly 10,000—increasing its share by 361%.

As with distribution by academic level, wide variations can be seen in distribution by field of study if a careful examination is made of the detailed data. Table 30 shows the distribution of foreign students by field of study within continent and, Appendix 6 provides the same data at the country level.

While Engineering is, in fact, the most popular field among foreign students, when analyzed as a whole, it ranks first only with Asian and Latin American students. With African and European students, Engineering ranks second to Business and Managment, and, with North Americans and Oceanians, it ranks fifth and sixth respectively. Education, which ranks seventh among all foreign students, is the most popular field for North Americans and Oceanians.

Table 31 shows, for 1975/6 only, the significant subfields of each of the major fields displayed in Table 29.

This structure adds an additional hierarchical level above the Hegis taxonomy explained in Appendix 8.

Tables 32, 33 and 34 show the distribution of fields by undergraduate and graduate levels. Table 32 gives the figures in absolute terms, Table 33 provides a percentage distribution within each field, and Table 34 provides the percentage distribution within each level.

The major eleven fields fall into three distinct groups when analyzed in terms of enrollment by academic level. In the undergraduate breakdown in Table 33, the first group comprises Fine and Applied Arts and the "Other" category (consisting mainly of Interdisciplinary Studies), the two fields in which more than 70% of the enrolled foreign students are undergraduates. The second group consists of Humanities, Business and Management, Engineering, and Health Professions in which 60% of foreign student enrollment for each is undergraduate. The third group, with around 40% enrolled at the undergraduate level, consists of Engineering, Social Sciences, Natural and Life Sciences, Mathematics and Computer Sciences, and Agriculture. Overall a little more than half the foreign students are enrolled at the undergraduate level. Clearly, the reverse is true on the graduate side of the table (e.g., the third group is Fine and Applied Arts and "Other").

The disparity between undergraduate and graduate enrollment within field can be seen in another way in Table 34, which shows the percentages of undergraduates and graduates in each field. The proportion of students enrolled in each field varies considerably depending on the level. At both levels, Engineering is the largest group, but larger at the undergraduate level (25%) than at the graduate level (22%). The most striking difference between the two academic levels is in the second largest group. At the undergraduate level, Business and Management is clearly second with 19%, whereas at the graduate level the next largest groups are Social Sciences and Natural and Life Sciences at 16%; at the graduate level, Business and Management ranks fourth with enrollment of 12.2%, and Natural and Life Sciences and Social Sciences are in third and fourth places in the undergraduate enrollment with only 11% and 8% of the foreign students. Education constitutes 4% of undergraduates, but accounts for 7% of graduates. On the other hand, Fine and Applied Arts constitutes 6% of undergraduates but accounts for only 3% of graduates.

In Appendix 4 are the breakdowns of fields within academic levels for each of the major regions for 1975/6. Appendix 6 shows the percentage distribution within region, subregion and country of graduates and undergraduates within field of study. Only countries where the size of the foreign student group was sufficiently large have been included in Appendix 6.

In the 1976/7 survey, the OPScan questionnaire asked a number of questions not included in previous years, and Table 35 shows the level of response received for each of those questions. The answers to the questions about sex, fields of study and country of origin have been used extensively in the preparation of preceding sections. It can be seen in Table 35 that the level of response in respect to all but two of the questions (those dealing with follow-up information and programs completed during the previous year) provided a sufficiently large sample so that general characteristics can be attributed.

Table 36 provides detail that allows a discussion of several characteristics. As can be seen, about three-quarters of the foreign students enter the United States on an F visa, and about the same number enter directly from their home country, although one cannot assume the two facts to be wholly interrelated. It is especially interesting to note that 29% of the students have entered their present institution as transfer students from another U.S. college or university.

Replies to the question about the students' primary source of funds are perhaps categorized too broadly. If one combines the students who answered this question by indicating that their primary source was personal, the total is approximately 61%. Personal, in this sense, includes all of the following categories: Personal/U.S., Personal/Foreign, On or Off-Campus employment, and employment of Spouse. Next in importance came government support, reported by 18.5%, although distributed unequally between home government support (13.5%) and U.S. government support (5%). Support from their present college or university was the third major category, with 12.7% of the respondents reporting this as their major source. No attempt has been made in this question to discover whether the funds are in actual dollars or in such other forms as tuition waivers. Finally, private sources were indicated by 6.5% of the students.

As can be seen by examining the survey materials which are reproduced in Appendices 9 and 10, an attempt has been made to simplify these forms in hopes of improving both the level and quality of the responses. The next edition of *Open Doors* will allow some comparisons with the data collected in the first set of OPScan reports.

APPENDIX 2

Notes

1. The Base Number of 140,534 represents an actual count of non-immigrant foreign students where country of origin was known. It consists of reports from 1,868 institutions which reported the country of origin for each non-immigrant student.

2. The Extrapolated Count of 179,340 represents an actual count of non-immigrant students which includes both the Base Number of 140,534 and an additional 38,856 for which country was not specifically known. These 38,856 students were reported by 393 institutions but were not specified as to country of origin. Included in that group are 260 institutions which failed to report for 1975-76 but which had reported foreign students during the prior academic year.

3. The Base Number was distributed by country and each country's percentage of the total Base Number was calculated.

4. Extrapolated Counts were arrived at by multiplying the Base Number by a factor of 1.2761 (the Extrapolated Count divided by the Base Number) and rounded to the nearest 10.

5. Part 1 displays, for each country, the Base Number, the Percentage Distribution, and the Extrapolated Count, UNLESS:
   A. the Base Number for a country was lower than 70 but more than 20, in which case only the Base Number is shown;
   B. the Base Number for a country was less than 20 in which case, that country's total was added to all others of less than 20 and grouped under the appropriate sub-region.

6. Part 2 lists the countries within sub-regions for which the Base Number was less than 20.

APPENDIX 3

Notes

1. The Base Number of 86,662 represents an actual count of non-immigrant foreign students where country of origin was known. It consists of reports from 971 institutions which reported the country of origin for each non-immigrant student.

2. The Extrapolated Count of 203,070 represents an actual count of non-immigrant students which includes both the Base Number of 86,662 and an additional 116,408 for which country was not specifically known. These 116,408 students were reported by 1,323 institutions but were not specified as to country of origin.

3. The Base Number was distributed by country and each country's percentage of the total Base Number was calculated.

4. Extrapolated Counts were arrived at by multiplying the Base Number by a factor of 2.3432 (the Extrapolated Count divided by the Base Number) and rounded to the nearest 10.

5. Part 1 displays, for each country, the Base Number, the Percentage Distribution, and the Extrapolated Count, UNLESS:
   A. the Base Number for a country was lower than 70 but more than 20, in which case only the Base Number is shown;
   B. the Base Number for a country was less than 20 in which case, that country's total was added to all others of less than 20 and grouped under the appropriate sub-region.

6. Part 2 lists the countries within sub-regions for which the Base Number was less than 20.

Bhutan	2
Sikkim	2
Tibet	1
South East Asia	
Brunei	5
South West Asia	
Yemen, People's Democratic Rep.	1
Eastern Europe	
Bulgaria	8
Albania	7
Western Europe	
Luxembourg	15
Malta	7
Monaco	3
Andorra	2
Gibraltar	1
Liechtenstein	1
Caribbean	
St. Lucia	8
St. Vincent	8
Martinique	5
Dominica	4
Leeward Islands	3
Cayman Islands	2
Turks and Caicos Islands	2
Guadeloupe	1
South America	
Surinam	13
French Guiana	1
Oceania	
Papua New Guinea	9
French Polynesia	7
New Hebrides	1

*All figures in this table are included in the appropriate sub-region of the main table under the designation "Other."

APPENDIX 4

Foreign students by academic level within country, 1975/6.

NOTE: Not all countries are included in this Appendix. Only those where the total number of students was about 500 or more and where the 'sample' had sufficient detail regarding academic level are shown. A complete list of countries and the foreign students reported from each will be found in Appendixes 2 and 3.

APPENDIX 5

Foreign students by continent, field of study and academic level, 1975/6.

NOTE: The figures in this appendix have been calculated by applying the percentage distributions from Appendix 6 to the extrapolated counts listed in Appendix 2. Because of the fairly large size of each of the continental groups, a high degree of confidence can be had with the following data. All figures have been rounded to the nearest 10.

AFRICA

APPENDIX 6

Foreign students in the U.S. by country, field of study, and academic level, 1975/6.

NOTE: All figures in this Appendix are percentages. Actual numbers for continental groups can be found in Appendix 5 in respect to fields of study or Appendix 4 in respect to academic levels.

This table has been produced through the use of a formula which requires that a country have at least 75 students in order to be displayed. Additionally, a minimum of 15 students within a specific field and level is required to produce a percentage calculation for display.

Nauru
New Caledonia
New Hebrides
Niue
Norfolk Island

Pacific Islands, Trust Territory of the
Papua New Guinea
Tonga
Wallis & Futuna Islands
Western Samoa

APPENDIX 8
Field of study taxonomy

Section I:

CONVENTIONAL ACADEMIC SUBDIVISIONS OF KNOWLEDGE AND TRAINING

0100 AGRICULTURE and NATURAL RESOURCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with the production of food and management of natural fiber, plant, forest, and wildlife resources.

0101 Agriculture, general
0102 Agronomy (field crops, and crop management)
0103 Soils science (management and conservation)
0104 Animal science (husbandry)
0105 Dairy science (husbandry)
0106 Poultry science
0107 Fish, game, and wildlife management
0108 Horticulture (fruit and vegetable production)
0109 Ornamental horticulture (floriculture, nursery science)
0110 Agricultural and farm management
0111 Agricultural economics
0112 Agricultural business
0113 Food science and technology
0114 Forestry
0115 Natural resources management
0116 Agriculture and forestry technologies (baccalaureate and higher programs)
0117 Range management
0199 Other, specify

0200 ARCHITECTURE and ENVIRONMENTAL DESIGN

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with training for a profession in designing buildings, communities, parks, and other manmade aspects of the physiosocial environment.

0201 Environmental design, general
0202 Architecture
0203 Interior design
0204 Landscape architecture
0205 Urban architecture
0206 City, community, and regional planning
0299 Other, specify

0300 AREA STUDIES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with programs designed to study cultures indigenous to specific geographic regions.

0301 Asian studies, general
0302 East Asian studies
0303 South Asian (India, etc.) studies
0304 Southeast Asian studies
0305 African studies
0306 Islamic studies
0307 Russian and Slavic studies
0308 Latin American studies
0309 Middle Eastern studies
0310 European studies, general
0311 Eastern European studies
0312 West European studies
0313 American studies
0314 Pacific area studies
0399 Other, specify

0400 BIOLOGICAL SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with the science of life or living matter in all its forms and phenomena especially with regard to the origin, growth, reproduction, and structure of life forms.

0401 Biology, general
0402 Botany, general
0403 Bacteriology
0404 Plant pathology
0405 Plant pharmacology
0406 Plant physiology
0407 Zoology, general
0408 Pathology, human and animal
0409 Pharmacology, human and animal
0410 Physiology, human and animal
0411 Microbiology
0412 Anatomy
0413 Histology
0414 Biochemistry
0415 Biophysics
0416 Molecular biology
0417 Cell biology (cytology, cell physiology)
0418 Marine biology
0419 Biometrics and biostatistics
0420 Ecology
0421 Entomology
0422 Genetics
0423 Radiobiology
0424 Nutrition, scientific (excludes nutrition in home economics and dietetics)
0425 Neurosciences
0426 Toxicology
0427 Embryology
0499 Other, specify

0500 BUSINESS and MANAGEMENT

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. related to the organization, operation, administration, and control of private and public organizations.

0501 Business and commerce, general
0502 Accounting
0503 Business statistics
0504 Banking and finance
0505 Investments and securities
0506 Business management and administration
0507 Operations research
0508 Hotel and restaurant management
0509 Marketing and purchasing
0510 Transportation and public utilities
0511 Real estate
0512 Insurance
0513 International business
0514 Secretarial studies (baccalaureate and higher programs)
0515 Personnel management
0516 Labor and industrial relations
0517 Business economics
0599 Other, specify

0600 COMMUNICATIONS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. related to collection, preparation, and presentation of ideas and information intended for popular consumption through mass media.

0601 Communications, general
0602 Journalism (printed media)
0603 Radio/television
0604 Advertising
0605 Communication media (use of videotape, films, etc., oriented specifically toward radio/television)
0699 Other, specify

0700 COMPUTER and INFORMATION SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, course work, research projects, etc. having to do with the design, development, and application of computer capabilities to data storage and manipulation and related computational procedures.

0701 Computer and information sciences, general
0702 Information sciences and systems
0703 Data processing
0704 Computer programming
0705 Systems analysis
0799 Other, specify

0800 EDUCATION

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. related to administration and control of educational organizations and institutions and subjects related to instruction and services both within and outside of such formal organizations.

0801 Education, general
0802 Elementary education, general
0803 Secondary education, general
0804 Junior high school education
0805 Higher education, general
0806 Junior and community college education
0807 Adult and continuing education
0808 Special education, general
0809 Administration of special education
0810 Education of the mentally retarded
0811 Education of the gifted
0812 Education of the deaf
0813 Education of the culturally disadvantaged
0814 Education of the visually handicapped
0815 Speech correction
0816 Education of the emotionally disturbed
0817 Remedial education
0818 Special learning disabilities
0819 Education of the physically handicapped
0820 Education of the multiple handicapped
0821 Social foundations (history and philosophy of education)
0822 Educational psychology (include learning theory)
0823 Pre-elementary education (kindergarten)
0824 Educational statistics and research
0825 Educational testing, evaluation and measurement
0826 Student personnel (counseling and guidance)
0827 Educational administration
0828 Educational supervision
0829 Curriculum and instruction
0830 Reading education (methodology and theory)
0831 Art education (methodology and theory)
0832 Music education (methodology and theory)
0833 Mathematics education (methodology and theory)
0834 Science education (methodology and theory)
0835 Physical education
0836 Driver and safety education
0837 Health education (include family life education)
0838 Business, commerce, and distributive education
0839 Industrial arts, vocational, and technical education
0899 Other, specify

0900 ENGINEERING

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with the practical application of basic scientific knowledge to the design, production, and operation of systems intended to facilitate man's control and use of his natural environment.

0901 Engineering, general
0902 Aerospace, aeronautical and astronautical engineering
0903 Agricultural engineering
0904 Architectural engineering
0905 Bioengineering and biomedical engineering
0906 Chemical engineering (include petroleum refining)
0907 Petroleum engineering (exclude petroleum refining)
0908 Civil, construction, and transportation engineering
0909 Electrical, electronics, and communications engineering
0910 Mechanical engineering
0911 Geological engineering
0912 Geophysical engineering
0913 Industrial and management engineering
0914 Metallurgical engineering
0915 Materials engineering
0916 Ceramic engineering
0917 Textile engineering
0918 Mining and mineral engineering
0919 Engineering physics
0920 Nuclear engineering
0921 Engineering mechanics
0922 Environmental and sanitary engineering
0923 Naval architecture and marine engineering
0924 Ocean engineering
0925 Engineering technologies (baccalaureate and higher programs)
0999 Other, specify

1000 FINE and APPLIED ARTS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with the creation and appreciation of the diverse modes of communicating ideas and emotions by means of stylized, visual, and nonvisual representations and symbols.

1001 Fine arts, general
1002 Art (painting, drawing, sculpture)
1003 Art history and appreciation
1004 Music (performing, composition, theory)
1005 Music (liberal arts program)
1006 Music history and appreciation (musicology)
1007 Dramatic arts
1008 Dance
1009 Applied design (ceramics, weaving, textile design, fashion design, jewelry, metalsmithing, interior decoration, commercial art)
1010 Cinematography
1011 Photography
1099 Other, specify

1100 FOREIGN LANGUAGES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. related to mastery of a language other than English or related to the study of a foreign culture through exploration of the literature of that culture as expressed in the vernacular language.

1101 Foreign languages, general (includes concentration on more than one foreign language without major emphasis on one language)
1102 French
1103 German
1104 Italian
1105 Spanish
1106 Russian
1107 Chinese

1108 Japanese
1109 Latin
1110 Greek, classical
1111 Hebrew
1112 Arabic
1113 Indian (Asiatic)
1114 Scandinavian languages
1115 Slavic languages (other than Russian)
1116 African languages (non-Semitic)
1199 Other, specify

1200 HEALTH PROFESSIONS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with the maintenance and restoration of physical and mental health.

1201 Health professions, general
1202 Hospital and health care administration
1203 Nursing (baccalaureate and higher programs)
1204 Dentistry, D.D.S. or D.M.D. degree
1205 Dental specialties (work beyond first-professional degree, D.D.S. or D.M.D.)
1206 Medicine, M.D. degree
1207 Medical specialties (work beyond first-professional degree, M.D.)
1208 Occupational therapy
1209 Optometry
1210 Osteopathic medicine, D.O. degree
1211 Pharmacy
1212 Physical therapy
1213 Dental hygiene (baccalaureate and higher programs)
1214 Public health
1215 Medical record librarianship
1216 Podiatry (Pod.D. or D. P.) or podiatric medicine (D.P.M.)
1217 Biomedical communication
1218 Veterinary medicine (D.V.M. degree)
1219 Veterinary medicine specialties (work beyond first-professional degree, D.V.M.)
1220 Speech pathology and audiology
1221 Chiropractic
1222 Clinical social work (medical and psychiatric and specialized rehabilitation services)
1223 Medical laboratory technologies (baccalaureate and higher programs)
1224 Dental technologies (baccalaureate and higher programs)
1225 Radiologic technologies (baccalaureate and higher programs)
1299 Other, specify

1300 HOME ECONOMICS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with the theory and practice of family and home care including the science of foods, home decoration and management, and child care.

1301 Home economics, general
1302 Home decoration and home equipment
1303 Clothing and textiles
1304 Consumer economics and home management
1305 Family relations and child development
1306 Foods and nutrition (include dietetics)
1307 Institutional management and cafeteria management
1399 Other, specify

1400 LAW

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with instruction in the legal customs, practices, and rules of society and states for the purpose of pursuing a career in jurisprudence.

1401 Law, general
1499 Other, specify

1500 LETTERS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with English language and literature and value systems related to ancient and modern cultures.

1501 English, general
1502 Literature, English
1503 Comparative literature
1504 Classics
1505 Linguistics (include phonetics, semantics, and philology)
1506 Speech, debate, and forensic science (rhetoric and public address)
1507 Creative writing
1508 Teaching of English as a foreign language
1509 Philosophy
1510 Religious studies (exclude theological professions)
1599 Other, specify

1600 LIBRARY SCIENCE

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with instruction in the professional skills required to organize collections of books and related materials and the training necessary for providing services related to them.

1601 Library science, general
1699 Other, specify

1700 MATHEMATICS

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with the science of numbers and space configurations and their operations, measurement, relationships, and abstractions.

1701 Mathematics, general
1702 Statistics, mathematical and theoretical
1703 Applied mathematics
1799 Other, specify

1800 MILITARY SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with techniques and skills unique to the pursuit of a professional career as a military officer.

1801 Military science (Army)
1802 Naval science (Navy, Marines)
1803 Aerospace science (Air Force)
1899 Other, specify

1900 PHYSICAL SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with the basic nature of matter, energy, and associated phenomena.

1901 Physical sciences, general
1902 Physics, general (exclude biophysics)
1903 Molecular physics
1904 Nuclear physics

1903 Chemistry, general (exclude biochemistry)
1906 Inorganic chemistry
1907 Organic chemistry
1908 Physical chemistry
1909 Analytical chemistry
1910 Pharmaceutical chemistry
1911 Astronomy
1912 Astrophysics
1913 Atmospheric sciences and meteorology
1914 Geology
1915 Geochemistry
1916 Geophysics and seismology
1917 Earth sciences, general
1918 Paleontology
1919 Oceanography
1920 Metallurgy
1999 Other, specify

2000 PSYCHOLOGY

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with behavioral and mental processes.

2001 Psychology, general
2002 Experimental psychology (animal and human)
2003 Clinical psychology
2004 Psychology for counseling
2005 Social psychology
2006 Psychometrics
2007 Statistics in psychology
2008 Industrial psychology
2009 Developmental psychology
2010 Physiological psychology
2099 Other, specify

2100 PUBLIC AFFAIRS and SERVICES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. related to developing and improving competencies in the management and operation of governmental agencies.

2101 Community services, general
2102 Public administration
2103 Parks and recreation management
2104 Social work and helping services (other than clinical social work)
2105 Law enforcement and corrections (baccalaureate and higher programs)
2106 International public service (other than diplomatic service)
2199 Other, specify

2200 SOCIAL SCIENCES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. having to do with all aspects of the past and present activities, conduct, interactions, and organizations of humans.

2201 Social sciences, general
2202 Anthropology
2203 Archaeology
2204 Economics
2205 History
2206 Geography
2207 Political science and government
2208 Sociology
2209 Criminology
2210 International relations
2211 Afro-American (black culture) studies
2212 American Indian cultural studies
2213 Mexican-American cultural studies
2214 Urban studies
2215 Demography
2299 Other, specify

2300 THEOLOGY

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. related to preparation and training for a religious vocation.

2301 Theological professions, general
2302 Religious music
2303 Biblical languages
2304 Religious education
2399 Other, specify

4900 INTERDISCIPLINARY STUDIES

Subject field designations which characterize students, faculty, facilities, degree programs, research projects, etc. involving more than one major discipline without primary concentration in any one area.

4901 General liberal arts and sciences
4902 Biological and physical sciences
4903 Humanities and social sciences
4904 Engineering and other disciplines
4999 Other, specify

Section II:

TECHNOLOGICAL AND OCCUPATIONAL CURRICULUMS LEADING TO ASSOCIATE DEGREES AND OTHER AWARDS BELOW THE BACCALAUREATE

5000 BUSINESS and COMMERCE TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc. specifically associated with development of skills required for commercial, business, or secretarial occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5001 Business and commerce technologies, general
5002 Accounting technologies
5003 Banking and finance technologies
5004 Marketing, distribution, purchasing, business, and industrial management technologies
5005 Secretarial technologies (include office machines training)
5006 Personal service technologies (stewardess, cosmetologist, etc.)
5007 Photography technologies
5008 Communications and broadcasting technologies (radio/television, newspapers)
5009 Printing and lithography technologies
5010 Hotel and restaurant management technologies
5011 Transportation and public utility technologies
5012 Applied arts, graphic arts, and fine arts technologies (include advertising design)
5099 Other, specify

5100 DATA PROCESSING TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc. specifically associated with development of skills required for data processing or related occupations at the

semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5101 Data processing technologies, general
5102 Key punch operator and other input preparation technologies
5103 Computer programmer technologies
5104 Computer operator and peripheral equipment operation technologies
5105 Data processing equipment maintenance technologies
5199 Other, specify

5200 HEALTH SERVICES and PARAMEDICAL TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc. specifically associated with development of skills required for health service related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5201 Health services assistant technologies, general
5202 Dental assistant technologies
5203 Dental hygiene technologies
5204 Dental laboratory technologies
5205 Medical or biological laboratory assistant technologies
5206 Animal laboratory assistant technologies
5207 Radiologic technologies (X-ray, etc.)
5208 Nursing, R.N. (less than 4-year program)
5209 Nursing, practical (L.P.N. or L.V.N.—less than 4-year program)
5210 Occupational therapy technologies
5211 Surgical technologies
5212 Optical technologies (include ocular care, ophthalmic, optometric technologies)
5213 Medical record technologies
5214 Medical assistant and medical office assistant technologies
5215 Inhalation therapy technologies
5216 Psychiatric technologies (include mental health aide programs)
5217 Electro diagnostic technologies (include E.K.G., E.E.G., etc.)
5218 Institutional management technologies (rest home, etc.)
5219 Physical therapy technologies
5299 Other, specify

5300 MECHANICAL and ENGINEERING TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc. specifically associated with development of skills required for mechanical and engineering related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5301 Mechanical and engineering technologies, general
5302 Aeronautical and aviation technologies
5303 Engineering graphics (tool and machine drafting and design)
5304 Architectural drafting technologies
5305 Chemical technologies (include plastics)
5306 Automotive technologies
5307 Diesel technologies
5308 Welding technologies
5309 Civil technologies (surveying, photogrammetry, etc.)
5310 Electronics and machine technologies (television, appliance, office machine repair, etc.)
5311 Electromechanical technologies
5312 Industrial technologies
5313 Textile technologies
5314 Instrumentation technologies
5315 Mechanical technologies
5316 Nuclear technologies
5317 Construction and building technologies (carpentry, electrical work, plumbing, sheet metal, air conditioning, heating, etc.)
5399 Other, specify

5400 NATURAL SCIENCE TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs, etc. specifically associated with development of skills required for natural science related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5401 Natural science technologies, general
5402 Agriculture technologies (include horticulture)
5403 Forestry and wildlife technologies (include fisheries)
5404 Food services technologies
5405 Home economics technologies
5406 Marine and oceanographic technologies
5407 Laboratory technologies, general
5408 Sanitation and public health inspection technologies (environmental health technologies)
5499 Other, specify

5500 PUBLIC SERVICE RELATED TECHNOLOGIES

Subject field designations which characterize students, faculty, facilities, degree and certificate programs etc. specifically associated with development of skills required for public service related occupations at the semiprofessional level. Two years of preparation beyond high school are usually sufficient for entrance into these occupational fields.

5501 Public service technologies, general
5502 Bible study or religion-related occupations
5503 Education technologies (teacher aide and 2-year teacher training programs)
5504 Library assistant technologies
5505 Police, law enforcement, corrections technologies
5506 Recreation and social work related technologies
5507 Fire control technology
5508 Public administration and management technologies
5599 Other, specify

APPENDIX 9
Survey materials, 1975/6.

Institute of International Education
809 UNITED NATIONS PLAZA, NEW YORK, N.Y. 10017

Joint Task Force
on the Census

AACRAO • IIE • NAFSA

December 11, 1975

Dear Colleague:

We are writing to request your continued cooperation in the annual Census of Foreign Students in the U. S.

As you know, the data you report through the Census is published in Open Doors, the only comprehensive source of information on educational exchange between other countries and the United States.

In an attempt to increase the usefulness of Open Doors, last year the Joint Task Force simplified Census procedures which now enable you to decide what information you can supply and how best to report it.

Last year we polled 3,085 institutions listed in the Education Directory; of the institutions polled, nearly 2,000 reported Foreign Students. As a result of the positive responses, we are able to give information on 219,000 foreign students, compared to a total of 151,066 reported the previous year using the old procedures. We believe these more complete results are attributable to the active collaboration of AACRAO, IIE and NAFSA in its design and to your active cooperation in its implementation.

Sometime towards the end of December, Census results on the number of Foreign Students enrolled at U. S. colleges and universities for the academic year 1974-75 should be available. A more complete analytical report for academic year 1975-76 along with the results of a confidential survey that was done last year will be published in the spring. (The confidential survey was a sample of a select number of Foreign Students enrolled at U. S. colleges and universities asking them 15 simple questions, such as country of citizenship, academic status, field of study, age, type of visa, etc.)

AACRAO, IIE and NAFSA are indebted to the thousands of Foreign Student Advisors, Registrars, and other officials who have provided invaluable assistance in the conduct of the Census in the past. We again look forward to your help.

Sincerely,

Robert E. Slattery
Director
Information Services

OVERSEAS OFFICES NAIROBI LIMA HONG KONG BANGKOK

INSTRUCTIONS FOR STEP II (Step I instructions are included on Step I Report Form)

All institutions should do Part A if possible. All institutions that cannot do Part A should do Part B.

Part A This part requests the country, academic level, and major field for each nonimmigrant foreign student enrolled. The information received will be used to extrapolate the countries, academic levels and fields for the entire foreign student population. If the Part A reports received provide an insufficient basis for making valid statistical extrapolations, then additional institutions will have to be randomly selected, and asked to gather this information. It is our hope that we will need to request this additional information of few, if any, institutions. However, this will depend on how many institutions supply Part A reports now. We, therefore, ask that you do Part A, if at all possible.

1. The deadline for receipt of Part A reports is January 9, 1976.

2. Please provide for each nonimmigrant foreign student enrolled:

   1) Country of citizenship

   2) Academic level (undergraduate, graduate pursuing PhD, etc.)

   3) Major field of study

3. This information may be supplied in whatever form is most convenient for you: computer print-out, typed list, printed directory, etc.
   IMPORTANT: If your report will contain code numbers or abbreviations, please be sure to include a key for translating the codes or abbreviations used, and identify the coding system if it is one in standard use, such as HEGIS.

   If you will be providing a computer print-out and it is at all possible, please sort the file by country first, rather than alphabetically by the students last name.

4. Step II covers nonimmigrant students only. If your report contains students on immigrant visas (permanent residents) and they cannot readily be excluded, please indicate these immigrant visa-holders in some way. Mark their names, or indicate visa type along with the other information.

5. Please be sure to include your name, title, office and telephone number, and the name and address of your institution with your report.

6. Send the completed Part A report to:

   Census Division
   Institute of International Education
   809 United Nations Plaza
   New York, New York 10017

Part B This part requests a numerical breakdown of nonimmigrant foreign students by country. All institutions that do not have Part A information in their records, should do Part B. It is essential to know at least the distribution of countries for all nonimmigrant foreign students.

1. The deadline for receipt of Part B reports is January 9, 1976.

2. Please see the attached blue Part B Report Form.

3. Please fill in the information requested in the upper right hand corner of the form.

4. Please fill in the number of nonimmigrant students for each country represented in your foreign student population.
   NOTE: The countries listed on the form account for approximately 90% of foreign students. Use the blanks on page 3 to report students from countries that are not listed.

5. Return the completed Part B report in the enclosed pre-addressed envelope.
   IMPORTANT: Be sure to apply postage to the return envelope before mailing. It is not a business reply envelope and will not be delivered to us without postage, according to the recent Post Office regulation which eliminated "postage due" deliveries.

1975 - 76 ACADEMIC YEAR SURVEY

Joint Task Force on the Census

AACRAO • IIE • NAFSA

Name : _____

Title/Office : _____

Institution : _____

Step I

City/State/Zip Code : _____

Report Form & Instructions

Telephone Number : ( ) _____

Please fill in and return this report as soon as possible, even if you have no foreign students.

The deadline for receipt of Step I reports is January 9, 1976.

Please read the two items on the back of this form before answering the following questions.

1. Are there any foreign students currently enrolled at your institution? YES ☐ NO ☐

   a. If "YES", fill in the total number of foreign students in the box at the right. ☐

   b. This number is: ☐ exact ☐ an estimate

   c. What is the source of this data? ☐ total enrollment headcount

      ☐ records of students registered with the Foreign Student Advisor

      ☐ other (specify) _____

2. Do you have any students enrolled who are on immigrant visas (permanent residents)? YES ☐ NO ☐

   a. If "YES", fill in the total number of such students in the box at the right (estimate if exact number is not known). ☐

   b. This number is: ☐ exact ☐ an estimate

   c. Are these students included in the number reported for Question 1a? YES ☐ NO ☐

If your answer to Question 1 is "NO", skip Question 3 and return this report. There is nothing else you need to do for this year's Census.

If your answer to Question 1 was "YES", please read the Instructions for Step II, decide which of the two parts you will be able to send, and indicate your choice below.

3. Which part of Step II will you send? Part A ☐ Part B ☐

THANK YOU FOR YOUR COOPERATION!

1. Definition of Foreign Students for Question 1: all students who are citizens of countries other than the United States, regardless of visa status or academic level, who are enrolled for the fall semester, 1975.

   Do Not Include students who are:

   -U. S. citizens born abroad or resident abroad

   -children of U. S. diplomats, missionaries, or other U. S. citizens

   -citizens of Puerto Rico, Guam, American Samoa, or the U. S. Virgin Islands

   -high school or preparatory students

   -trade school students without high school diplomas or the equivalent

   -teachers or advanced researchers primarily

   -physicians serving as interns or residents in American hospitals

   -practical trainees not officially registered at your institution

2. It is important to distinguish immigrant from nonimmigrant students for the Census. Although immigrant visa-holders (permanent residents) are included in the above definition, some schools do not consider them to be "foreign students" and do not usually report them for the Census. For Question 2, please give at least an estimate of the number of immigrants enrolled, and indicate whether or not you included them in the foreign student total reported for Question 1. Immigrants and nonimmigrants will be distinguished in the published Census reports, and Step II will cover only nonimmigrant foreign students.

Send the completed report to:

STEP II - Part B

Report Form

Please read the Instructions for Step II before filling in this report.

The deadline for receipt of Part B reports is January 9, 1976.

*These categories cover only the countries specified. Students who give their citizenship simply as "China", "Germany","Korea", "United Kingdom", or "Vietnam" should be listed separately under the "Unspecified" headings.

Where possible, please report students under their specific countries within the United Kingdom: England, Northern Ireland, Scotland, Wales, the Channel Islands, and the Isle of Man.

PLEASE FILL IN THE TOTAL NUMBER OF NON-IMMIGRANTS REPORTED: [ ]

APPENDIX 10
Survey materials, 1976/7.

Joint Task Force on Data Collection
AACRAO • IIE • NAFSA

October 15, 1976

Dear Colleague:

Once again we are writing to request your assistance with the foreign student data collection program which is being developed by the Joint Task Force on Data Collection (AACRAO·IIE·NAFSA). The enclosed forms represent the continuing efforts of this group to establish a data collection system which will make available on a national basis all the relevant information on international educational exchange activities. The results of the previous steps in this program have already made a significant increase in the usefulness of the annual census of foreign students which is compiled by the IIE and published in OPEN DOORS.

The main purpose of the program is to provide information which will: 1) assist schools in centralizing basic information about foreign students and scholars; 2) make easier the jobs of those who must deal with foreign nationals and make reports on them to faculty committees, governing boards, and external organizations; 3) assist local, state, national and international policy makers by providing them with information.

These more comprehensive and complete results of your cooperation in supplying the necessary data will be of immense assistance to every college and university in providing requested information about educational exchange on an institutional, state and national level.

Realizing the difficulties of implementing a new plan and using new forms, it is anticipated that the system, especially the use of the INDIVIDUAL RECORD FORMS, will be phased in over a period of time for all newly admitted students. In the meantime we believe that most of the information required in the FOREIGN STUDENT ACTIVITY FORMS can be provided by the institutions with large foreign student enrollments from existing records.

Recognizing the urgent importance of this attempt to coordinate the collection of data, each of the participating organizations has agreed to solicit the enthusiastic cooperation of its respective members in this task. Last year's experimentation with the program encourages us to believe that we shall receive your assistance in the successful implementation of this next step. The enclosed detailed set of instructions will be useful to you in the submission of the information which we request be mailed to Gerald Raymond, Census Division, Institute of International Education, 809 United Nations Plaza, New York, New York 10017, by no later than December 10, 1976.

The forms were approved by the Task Force after wide consultation with many individuals and institutions. With this joint preparation and with your help, this new system will centralize information and provide a new pattern of cooperation among all those in the educational community who are involved in international educational interchange.

Thank you for your help in this matter.

Sincerely,

Naomi M. McCracken
President, American Association of Collegiate Registrars and Admissions Officers

Wallace Edgerton
President, Institute of International Education

Sanford C. Jameson
President, National Association for Foreign Student Affairs

INSTRUCTIONS

The requested information consists of two forms which are divided into three areas. The first area is totals for various categories of foreign students such as enrollment by visa status. The second area is enrollment by academic discipline. The third area is enrollment by country of citizenship. Since we are using optical scanning forms to facilitate data collection, more space, thus, more forms were required than for conventional methods.

REPORT THE INFORMATION THAT YOU HAVE OR THAT YOU CAN REASONABLY OBTAIN BY THE DEADLINE.

This may only be the total foreign students. Estimates are accepted. Any information you can report is important so that information concerning your institution can be appropriately reflected in the reports which will be compiled and distributed nationally.

When filling out these reports, use only a No. 2 lead pencil. Do not make stray marks on these forms or staple them or do anything that would interfere with the machine readability of the forms. Please PRINT or TYPE the name of the institution, your name and the date on all pages of the form.

When filling out the "Foreign Student Activity Report" section, write in the number in each of the boxes provided. Then "grid" in the appropriate number beneath each box by making a horizontal line through the printed number. Numbers should be right-justified with leading zeroes. Example: for total foreign students of ten (10) you would write and code 0010.

When filling out the "Foreign Student Enrollment by Countries of Origin" and the "Foreign Student Enrollment by Academic Area" sections, you should simply write the number in the special boxes provided. You should form the numbers as illustrated at the bottom of each page. Although it is not clearly indicated, numbers should have both horizontal and vertical lines as if you were writing them. However, horizontal lines are not required. The only "odd looking" characters are the zero and the seven. All other characters are very similar to those we learned to make in grade school. Numbers should be right-justified with leading zeroes. Example: for twelve (12) students we would write in 012, .

There is a brief definition/explanation of each item in the "Foreign Student Activity Report" section and a brief explanation of the data requested in the other two sections, following these instructions. Further questions should be directed to: Lester A. Singletary, Director, Student Record Systems, Georgia State University, (404) 658-3684.

All forms (including partially completed forms) should be returned by December 10, 1976 to:

CENSUS DIVISION
INSTITUTE OF INTERNATIONAL EDUCATION
809 UNITED NATIONS PLAZA
NEW YORK, NEW YORK 10017

DEFINITIONS

ALL INFORMATION SHOULD BE BASED ON FALL TERM, 1976 ENROLLMENT UNLESS OTHERWISE INDICATED

Foreign Student Activity Report

1. TOTAL FOREIGN STUDENTS - for the purpose of this report a foreign student is defined as anyone who is enrolled for courses in the United States during the current fall term who is not a U.S. citizen or an immigrant. Refugees are included. Please indicate if the count is "Actual" or "Estimated."

2. MALES - number of male foreign students enrolled at your institution. Females will be derived by subtracting the number of males from total foreign students.

3. NON-RESIDENT VISA TYPE/REFUGEE - the count of foreign students with temporary visas enrolled at your institution by the type of visa they hold, and the count of refugees enrolled at your institution.

4. ENTRANCE - a count by category of the new foreign students who entered your institution this fall term directly from their home country or by transferring directly from another U.S. institution. "Other" entrance statuses will be derived by subtracting the sum of the two given categories from the total foreign students.

5. FOLLOW-UP INFORMATION - a count (by category) of foreign students who were enrolled during the past twelve months and terminated enrollment prior to this fall term. "Departed U.S." includes students who left the United States for any reason. "U.S. Transfer" is for students who transferred to another U.S. educational institution. "Applied Stat. Chg." is for those students who have applied for a change in status which would permit the student to remain in the U.S. permanently or temporarily - normally this situation occurs near or following graduation. "Vanished" means that you do not know the reason for the student's failure to continue enrollment at your institution. There is no relationship between this item and the total foreign students reported in item #1.

6. PRIMARY SOURCE OF FUNDS - the single greatest source of funds for all educational expenses including associated living expenses for a foreign student enrolled in an educational institution within the United States. If a person had more than one source of funds, then use the source which represents the largest percentage of all income.
   a. Personal/U.S. - income derived from personal or private sources in the U.S.
   b. Personal/Foreign - funds obtained through personal or private sources in a foreign country.
   c. College/University - funds obtained from a U.S. College or University (grants, scholarships, waivers, etc.). This does not include employment at the institution.
   d. Home Government - funds obtained from the government of the student's home country.
   e. U.S. Government - funds obtained from the United States government.
   f. Private Sponsorship Within U.S. - self-explanatory.
   g. Private Sponsorship Foreign - self-explanatory.
   h. On Campus Employment, Part Time - self-explanatory.
   I. Off Campus Employment - self-explanatory.
   J. Employment of Spouse - in United States.
   k. Other - primary source not among those listed.

7. BASIS OF DETERMINING ENGLISH PROFICIENCY - a count of the students by method used to determine English proficiency for purposes of admission to your institution.

8. PROGRAMS COMPLETED AT YOUR INSTITUTION WITHIN THE LAST YEAR BY FOREIGN STUDENTS - a count of foreign students who completed programs at your institution during the last twelve months. There is no relationship between this item and the total foreign students reported in item #1.

9. NOT MARRIED - a count of the foreign students at your institution who are not married. The number of married students will be derived by subtracting the not married count from the total count of foreign students.

10. FULL TIME STUDENT - the total number of foreign students who are attending classes full time. Use your institution's definition of full time. Part time students will be derived by subtracting the count of full time students from the total count of foreign students.

11. PROGRAMS CURRENTLY BEING PURSUED - a count of the foreign students by degree level or type of program who are currently enrolled this fall term.

FOR OFFICIAL USE ONLY - do not write in this area.

IS THIS A CONTINUED FORM? - If your institution has more than 9,999 foreign students or more than 999 in any one single category, then more than one form can be used. Only the "overage" should be written on the second form for those items with more than 999 students. For example, if you have 1,150 full time students, 999 should be written on form #1 and 151 should be on form #2. The counts supplied on the two forms will then be added together to obtain one number.

Foreign Student Enrollment by Academic Area

A count of the foreign students enrolled in your institution by major field of study (academic area). The categories used are the same as those used in a Higher Educational General Information Survey, (HEGIS) which is conducted by the U.S. Office of Education. Space has been provided for writing in other academic areas not listed.

Foreign Student Enrollment by Countries of Origin

A count of the foreign students enrolled at your institution by country of citizenship. Please note that there are several categories for some countries such as Germany and the United Kingdom. For example, if a student merely listed Germany as his country of citizenship, that person should be counted in the "Germany, unspecified" category. Space has been provided to list "other" countries and enrollment counts not pre-printed on the form.
